On Zoom

Tue. **08/04, 7-9:30 PM** Lecture/Demo by Peter Tea

At **Bonsai Garden** at **Lake Merritt**: [Google direction](#)

Sat. **07/04** docents are needed.

President's Special Message

I hope everyone is staying at home, if possible, during the Covid-19 outbreak. Protect yourself and stay healthy.

I have been in touch with our point of contact at the City of San Rafael regarding the availability of our club meetings and workshops at the Terra Linda Community Center. Due to Covid-19, there are restrictions in place requiring the maximum number of 12 members allowed for in person meetings and workshops. Our average of 20 members for any meeting prevents us from renting the facility. Our average of 10 to 12 members for any workshops would be allowable under strict RSVP by attendees. However, since Covid-19 poses risk to our membership, I have decided to cancelled the scheduled July and August in person meetings and workshops. The City of San Rafael appears to be taking steps to ease restrictions on a month to month basis. I will inform the membership as news becomes available.

The good news is that there will be a Zoom virtual meeting and presentation with Peter Tea on Tuesday evening, August 4, 2020, from 7:00 p.m. to 9:30 p.m. The subject of the presentation will be forthcoming. Peter has performed a number of successful Zoom presentations for other bonsai clubs. Details on the Zoom meeting and presentation will be provided at a later date.

During a recent MBC Board Zoom Meeting on June 10, the 2021 programs committee was appointed to begin thinking about the 2021 schedule of programs. The committee is comprised of Craig Thompson (leader), Marcia Summers and Gwynessa Aetherwyn.

We need to appoint a 2021 elections committee of three members to identify and nominate officers, board members and appointees by November 2020. If you are interested in being a part of this important committee, contact me at gwhaas@comcast.net. If you would like to take a role as an officer, board member and/or appointees, please contact me by calling 707-762-9154 or email gwhaas@comcast.net.

By the way, if you have not subscribed to Golden Statements Magazine, it easier than ever. The free subscription allows you to receive a quarterly automatic email notification when the magazine is posted online. The summer issue is packed with bonsai information. The summer issue was posted online on June 26, 2020. To view and subscribe, go directly to <http://www.gsbfbonsai.org/Articles.asp?ID=291>.

New! Ask the Task Master July 2020

(First of the new series, send in your questions to Lakeipad@mail.com)

Q: from Robert Cameron, MBC member

Question is what to do with treating an infestation of white scale (insects?) on an Elm tree. I have been treating it with neem and using light pressure washing to first kill then remove them, but they are persistent. I hoped to avoid toxic chemicals but it would be OK if a natural alternative is not available.

A: by the Task Master

Hi, Robbie; Taking all your research and its implied advice seriously, thanks for including us in your email list.

In answer to your question:

Scale sometimes can be controlled with Ortho Max Malathion as a spray.

Cautions:

Follow dilution proportions precisely.

Cover the soil, newspaper works well.

Thoroughly spray every secret inch from the soil line up, from the bottom side first, tilt the pot way over, then from the top.

Spray very early in the morning, so it all dries before the sun can speed it up or heat it up.

Pick an only moderately infested spot, memorize or take a picture of it, mark it with string or something, and check in a week to ten days. The scale, if dead, will still be there but if still alive will likely have become more numerous and/or widespread. If so, or if you're in doubt, you can repeat the Malathion spray once more, maybe twice in another week or ten days if it looks like you're winning. After that, if they are still multiplying you probably need a systemic, like maybe a single application of Bayer Tree and Shrub Dual-Action drench. Stuff is potent. If it doesn't work, you can harm the tree with repeat applications.

Dead hard scale, usually white, is cemented to its fixation point, and only gradually disappears, if ever. It can be removed mechanically if necessary. Its juveniles, hardly visible, slide out from the dome, crawl to a new spot, and cement themselves and reproduce.

CR (aka Chris Ross)

Dead inactive scale still in place, three weeks after successful treatment with Ortho Max Malathion, then a Summer dilution of Horticultural Oil one week later.

August Demo and Lecture

-- On Zoom --

08/04/2020 7:00 - 9:30

These books were recently donated to the club. The books are located at the Terra Linda Mini Storage locker the club rents. A sort of reservation system needs to be establish so the books can be retrieved from the locker when a member wants a titled book.

Bonsai Classes and Events

by

Lotus Bonsai Nursery & Gardens

Dear Friends in Bonsai,

The Covid 19 Pandemic has disturbed all of our activities. Bolet and I have been discussing how to proceed. Activity in the nursery has been high and many people are coming to visit, purchase bonsai and supplies, or simply enjoy the scenery. Our plan is to go ahead with a truncated schedule but continue to provide our clients with a high-quality bonsai experience.

Thank you for your patience during these trying times of ours. We are now ready to share our Class and Event Schedule for 2020-2021.

The schedule is not as extensive as in previous years but there are opportunities, both educational and recreational, for all. Our classes will be set up for physical distancing. We expect everyone to have their masks on or available during class. As always, we will provide most of what is needed for

the class, unless otherwise indicated (i.e., Better Bonsai Workshop). We expect you to bring your own tools. Otherwise, we have loaner tools.

For our digging trips, we request that you let us know as soon as possible if you are interested. These events fill quickly.

We look forward to seeing you soon at the nursery, for a class or just to visit.

Call or email us for appointment.

We have a special request from John Mekisich-Docent Scheduler here.

BGLM Volunteers & Docents,

Greetings everyone and welcome to July. We are in need of PM docent(s) for this coming Saturday July 4th. If you are available and can help please let me know.

July docent calendar is on our website and we have open shifts, please take a look if you have some free time and let me know if you are available.

Thanks in advance for your cooperation and for all you do at BGLM,

Happy 4th;

John Mekisich
